I'm a software engineer / computer scientist and a hacker in general who likes researching new ideas, developing impactful solutions, and teaching. Currently, my primary focus is software maintenance and evolution. I develop tools that assist software engineers in building healthy projects.

Achievements

QualityAssistant: My software-quality tool with a live feedback is integrated into the latest version of Pharo IDE. Expected usage: 30 commercial companies, 20 universities (for teaching).

Live 3D visualizations video [youtu.be/CuimMwuZiGA]: was used in a couple of dozen presentations for demonstrating the idea of live programming.

Employment

Universität Bern as *Research Assistant* Jan 2016 – Sep 2017 (expected)
Research on software quality and evolutionary monitoring. Maintenance of the group's git server. I've invented a 3D visualization that allows detection of defects in software quality evolution. Teaching.
